Expectations

Student Conduct

Academic integrity is of the highest importance at SAIT. Any suspected academic and non-academic misconduct will be investigated according to the Student Code of Conduct (AC.3.4) policies and procedures. If you have any questions on Student Code of Conduct in relation to this course, please contact your instructor.

Assessments

The due dates for assessments are inflexible. Exceptions maybe made under extreme circumstances and with valid documentation. Students may request feedback on late submissions, however, a grade of zero will be given to students for missed or late submissions.

Attendance

Attendance will be tracked by the instructor. Students are responsible for any keeping up with classes. Students developing a pattern of missed classes and/or assessments maybe referred to the Early Alert Program.

Communication

Communication (between the instructor and other students) is to be done during regular business hours (9:00 am – 5:00 pm Monday – Friday, except holidays). Any communication sent to the instructor outside of that will be replied to on the next business day. Please use Microsoft Teams for online communications. In-person and online meetings with the instructor must be scheduled and accepted by both parties at least 24 hours in advance.

Technology

The recommended hardware and software technologies for this course are located on the Software Development program webpage under “Next Steps”. The instructor is not responsible for technology that doesn’t meet the provided recommendations.
